

# COMMUNITY WILDLIFE CONFLICT Management in Chobe

Botswana's wildlife resources are an important asset to this country and bring revenue and jobs to her people. Wildlife conflict however, is on the rise. The cost of conflict is borne by rural communities living with our wildlife.

We need to involve local people in resolving and managing this problem while directing benefits to offset livelihood costs. Together with Government, NGOs and donors, our program aims to empower local people to work effectively with Department of Wildlife and National Parks in managing wildlife conflict.

## CHOBE

LET US WORK TOGETHER TO HELP OUR RURAL COMMUNITIES!
